# Come home to Nectre Baker's Oven

## A heater and classic wood oven and cooktop combined.

A unique combination of a heater and an oven, with style from a bygone era. The Nectre Baker's Oven will cook everthing from crispy, fresh bread to succulent juicy roasts. The cook top takes four large saucepans or pots, and two for wok cooking. And, while it's cooking it spreads cosy warmth through your kitchen or living area. An optional water jacket can be fitted to supplement your existing hot water system, too.

### Features:

- Firebricks to increase thermal mass, stabilise temperatures.
- Replaceable fire box protection plates.
- Ash lip to prevent ash from dropping into the oven and hot coals falling out.
- Cast iron doors with large ceramic glass viewing areas.
- Oven temperature thermometer.
- Stay cool spring door handles.
