Contemporary & Traditional Electric Fires

## Contemporary Electric Fires

We want you to enjoy your new Cradle Mountain Electric Fire right from the start.

This truly stunning European range of Cradle Mountain Fireplaces will add that finishing touch to any contemporary home, apartment, resort, hotel or reception!

Ideal for the bedroom, living or dining area, these slimline electric units will furnish any room with a relaxing ambience while at the same time providing a direct source of hot air on that chilly evening or morning.

Our stunning range of European designed and made electric fires can be operated independently of heat, so you can indulge in the glowing flame effect any time of the year. All electric fires feature an innovative flame picture system which ingeniously captures the charm, warmth and coziness of a traditional fuel fire. With an efficiency of 100%, they can be run at either 1kW or 2kW.

### Installation advantages

The contemporary fires come with a bracket that is simply screwed into a wall. The fire is then mounted to the bracket. These fires do not require a flue. Simply plug the fire into a power point for an instant blast of 105°C air.

## Brooklyn

New York style, easy life. The Brooklyn fire hangs straight onto the wall and opens up a room with its high tech looks and sleek lines - no need for a surround or hearth. LED light source means no bulb changing and reduced running costs; the one piece pebble fuel bed makes it easier to install and less tempting for little fingers.

Brooklyn Electric Fire | 58208220

## Glamour

The Glamour fire is a minimalist design proving that 'cool' does not have to mean cold. Sleek and elegant, the Glamour will fit effortlessly into a modern designed room. The slimline wall mounted landscape fires are increasingly popular and the Glamour features a chic, white pebble fuel bed, backed by a polished chrome rear reflector to provide that really warm glow effect at night. The fascia consists of two elements, a contemporary white 'floating' glass panel surrounded by a brushed chrome aluminium trim that really adds the finishing touch.

## Liberty

Break free from the norm with this ultra modern fire that creates a design statement in the most minimalist homes. The clean lines and cool sophisticated brushed steel finish adds to the impressive flame picture, to create a perfect ambience. Liberty also offers you all the convenience of a remote control, allowing 100% control at the touch of a button.

Liberty Electric Fire | 5823D120

## Visia

Electrifying design. A contemporary hang on the wall landscape electric fire which boasts a smart two-tone fascia in black glass on white. A reflective back panel also creates a stunning backdrop for Visia's enviable electric glow, which provides 2kW of heat when required.

Visia Electric Fire | 58205220

## Metropolis

The Metropolis offers a super sleek look in black glass. Its single piece fascia features a subtle edge design and curved corners that gently soften the high tech look. The white pebble bed underscores the wide flame effect and continues to create interest even when the fire is no longer lit.

## Wood Fires

Cradle Mountain Fireplaces also offer a range of Wood fires, please contact us for further information.

# Traditional Electric Fires

We want you to enjoy your new Cradle Mountain Electric Fire right from the start.

That's why we've made it easy for you to select the fire that's perfect for you and your home. Enjoy the wonderful ambience of an incredible life like fire combined with 100% efficiency, easy installation and quick to purchase units.

Our stunning range of European designed and made electric fires can be operated independently of heat, so you can indulge in the glowing flame effect any time of the year. All electric fires feature an innovative flame picture system which ingeniously captures the charm, warmth and coziness of a traditional fuel fire.

With an efficiency of 100%, units can be run at either 1kW or 2kW.

All inset fires have rubber feet on the fender to avoid scratching expensive hearths and two alternative fixing methods to stop it being pulled over. All products have a fitted plug with two metres of cable.

The Traditional range of Cradle Mountain Fireplaces are truly beautiful. They will add a touch of practicality and ingenuity to provide any home with a sense of warmth and charm.

## Installation Advantages

None of our electric fires require a flue. A spacer kit is available for the traditional range which closes the gap between the fire and the wall when such an installation is preferred. Alternatively, they can be mounted into a wall. The wafer thin inset depth of 75mm makes fitting anywhere a breeze! Simply plug the fire into a power point for an instant blast of 105°C air.

## Suite 1
